

THE FORMULA FOR SUCCESS®

RG 14

Studies show horses that consume high levels of cereal grains develop exceptionally high glucose levels 2-4 hours after eating. Researchers hypothesize that insulin produced during starch (cereal grain) digestion may hinder proper skeletal development and integrity.

Edge Technology based products use “super-fibers” which are digested as fiber in the cecum, but provide readily accessible forms of energy, equivalent to 90% the value of oats. Hallway Feeds compliments these fiber sources with vegetable oil which is 2 ¼ times more energy dense than cereal grains. RG 14 is fortified with Stamm 30®, providing bioavailable sources of critical micronutrients to both mature and developing horses.

Feeding Instructions

RG 14 is designed to be fed at 6-18 pounds per day depending on the horse's size, body condition, development and reproductive stage. RG 14 is fully-fortified, so additional protein, vitamin or mineral supplements are unnecessary if fed as directed. Always provide clean, fresh water and high quality hay.

- FOR YOUNG HORSE DEVELOPMENT AND MATURE HORSE MAINTENANCE
- UTILIZES THE LATEST SCIENTIFIC INNOVATIONS
- NUTRIENT DENSE TEXTURED SWEET FEED
