

THE FORMULA FOR SUCCESS®

# Re-Leve®

As the first research-based, low-starch feed, Re-Leve® and Re-Leve® Concentrate are designed for horses prone to muscular disorders and metabolic syndromes, including:

- Polysaccharide Storage Myopathy (PSSM or EPSM)
- Laminitis (founder)
- Recurrent Exertional Rhabdomyolysis (RER)
- Cushing's Syndrome

Studies have shown that replacing traditional grain-based diets with Re-Leve results in significant improvement in horses with RER, PSSM and EPSM, providing relief from muscle stiffness and soreness when combined with regular daily exercise.

## Re-Leve Original Feeding Instructions

Feed at a rate of 2.5-9 kg (6-20 lb) per day depending on the level of work as well as the size and body condition of the horse. Re-Leve Original should be fed with high-quality hay equaling at least 1-1.5% of the horse's body weight per day. Replace the horse's current grain ration with an equivalent amount of Re-Leve Original.

If a horse requires less than 3 kg (6 lb) of grain per day, consider using Re-Leve Concentrate.

## Re-Leve Concentrate Feeding Instructions

Feed at a rate of 3-9 lb (1.5-4 kg) per day depending on the level of work as well as the size and body condition of the horse. Re-Leve Concentrate should be fed with high-quality hay equaling at least 1-1.5% of the horse's body weight per day. Replace the horse's current grain ration with an equivalent amount of Re-Leve Concentrate.

## NUTRITIONAL ANALYSIS

	ORIGINAL	CONCENTRATE
PROTEIN	12.5%	12.5%
FAT	12.5%	12.5%
FIBER	22%	18%
NSC*	10%	10%
CALCIUM	.9%-1.4%	1%-1.5%
